Office Action Summary	Application No. 10/642,378	Applicant(s) GARRISON, JOHN MICHAEL	
	Examiner Stephen Gordon	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Color photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

2. New corrected drawings are required in this application because the drawings filed 8-14-03 are informal, and clear reference numbers with associated tag lines should additionally be included on the figures. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Art Unit: 3612

3. The disclosure is objected to because of the following informalities: proper reference to the relied upon provisional application should be included at the beginning of page 1 of the instant specification.

Appropriate correction is required.

4. Claim 1 is objected to because of the following informalities: lines 2 and 3 are generally awkward. If —so as to be— and —with were inserted after “dimensioned on line 2 and “associated” on line 3 respectively, the claim would be correct in this regard. Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Frankel.

Frankel teaches a accessory in figure 10 which could be attached forward of a motorcycle's handlebars including a planar portion with a beverage container holding aperture 636+, a compartment 644,646+, and a cover 650+ as broadly claimed. In as much as the motorcycle per se is not a positively recited element of the instant claimed combination, the functional/positional language relating thereto is given little patentable weight.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3612

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 1 is alternatively rejected under 35 U.S.C. 103(a) as being unpatentable over Li in view of Marstall.

Li teaches a motorcycle accessory 20 which is attached forward of a motorcycle's handlebars including a planar portion with a beverage container holding aperture 45 and a compartment 32+ as broadly claimed.

Li fails to specifically teach a cover on the compartment.

Marstall teaches a compartment mounted adjacent a motorcycle handlebar including a cover 31.

In order to better protect contained objects from external weather conditions, it would have been obvious to one of ordinary skill in the art to fit the compartment of Li with a cover in view of the teachings of Marstall.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note at least Trautman teaches a beverage container holder for a motorcycle.
